

Mobile Security Tips

- Set a password on your mobile device
- Only download apps from trusted sources:
 - Google Play
 - Apple App Store
 - Amazon App Store
- Use discretion when downloading apps
- Pay close attention to all website addresses to make sure they match the website it claims to be, especially if you are asked to enter account or login information
- Download a mobile security app that scans every app you download for malware and spyware
- Check your phone bill
- Be alert for unusual behaviors on your phone, which could be a sign that it is infected
- Avoid financial transactions on public Wi-Fi
- Keep your phones firmware up-to-date
- Keep your apps up-to-date
- **PROTECT YOUR PHONE LIKE YOU PROTECT YOUR PC**
